FURNITURE DESIGN HOUSE

EXPO

SHELVING SYSTEM

EXPO is a versatile shelving system with a unique design based on a connecting detail of a brass rod and a steel profile. The system includes 2 mm thick steel shelves and X-shaped brass rods in the back.

The system is custom made and can be adapted and designed for each customer according to their needs.

Additional elements can be added to the system such as wooden boxes, shelves for wine glasses, a bench, a desk, leather hangers for wine bottles and more.

After confirming the first price assessment, the customer will receive an accurate quote according to the finishing details and dimensions. The design process, which includes simulation of the library, will be carried out after an advance payment (usually 10% of the total amount). There is no limit to the amount of time or number of options in the simulation process.

This double page spread presents some of the simulations and designs we have made for our clients over the years.

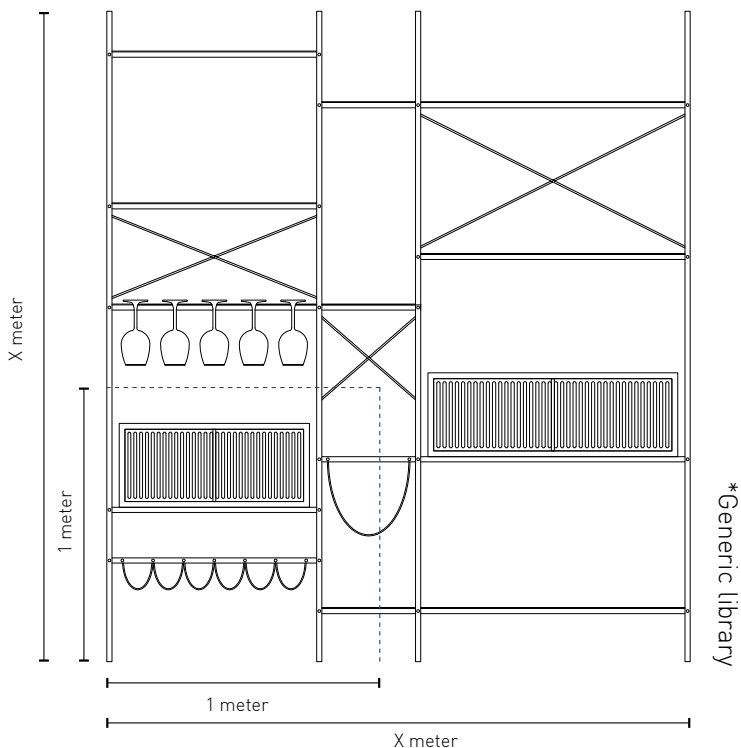

Info

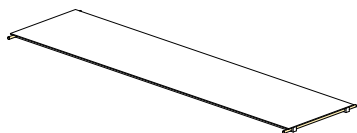

Fixed elements:

- Brass and Steel joint: The steel profile can be made from 18*18 or 16*16 mm thick rods, with Epoxy powder coating finish (RAL colors).
- Brass rod 10 & 6 mm thick.
