The **ANNA** shelving system is made of a thin steel rod skeleton and 3 mm thick steel shelves. The system can be enhanced with additional elements such as closed compartments, leather carriers, an open bookshelf and more. Tailored to meet specific storage requirements, the system is designed and planned based on the customer's needs and dimensions.

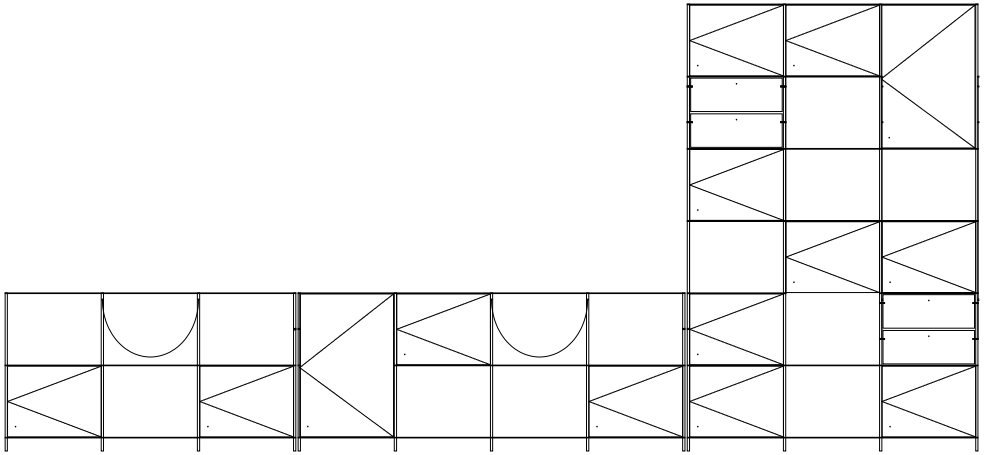

After confirming the first price assessment, the customer will receive an accurate quote according to the finishing details and dimensions. The design process, which includes simulation of the library, will be carried out after an advance payment (usually 10% of the total amount). There is no limit to the amount of time or number of options in the simulation process.

*Example

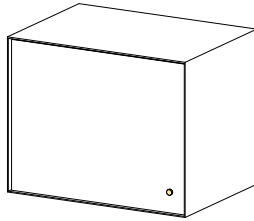

Elements:

- Column: Steel rod 10*10 mm (Epoxy powder coating finish, RAL colors) with brass or aluminium connection details.
- Steel Shelf (Epoxy powder coating finish, RAL colors).
- Closed compartments, steel door with brass handle (Epoxy powder coating finish, RAL colors).
- Steel Shelf for an open book.
- Leather rack for a blanket
- Division elements from steel/wood/leather.
- Straw box for storage
